pawonair

Professional Summary

Full-Stack Software Engineer with 6+ years of experience designing and delivering scalable web applications using Vue.js, Nuxt.js, React, JavaScript, TypeScript, and Node.js. Proven track record of owning end-to-end feature development in Agile/Scrum teams, optimising frontend performance, contributing technical documentation, and translating complex domain requirements into intuitive user interfaces. Experienced with GraphQL APIs, REST APIs, CI/CD pipelines, and cross-functional collaboration across SaaS, object-oriented design approach, and research-driven environments.

Work Experience

Feb 2024 **Research Assistant Software Engineer**, *Fraunhofer-Institut für Solare Energiesysteme*
– *ISE*, Freiburg, Baden-Württemberg, Germany

- Jan 2026
- Led **architectural design** and **foundational implementation** of **ELISE v2**, a scalable, data-driven web application built with Nuxt.js and Apollo GraphQL backed by a Neo4j graph database.
 - Designed and implemented responsive, performance-optimised user interfaces for managing and visualising large scientific datasets, improving perceived load performance by ~5% through GraphQL query optimisation and client-side cache rehydration.
 - **Migrated** client and server components to **long-term support versions**, improving stability and reducing data-processing latency by ~5%.
 - Redesigned identifier structures and frontend validation logic, improving data accuracy and traceability across the application.
 - Collaborated in an Agile workflow with researchers and stakeholders to translate complex domain requirements into intuitive user workflows.
 - **Technologies:** Vue.js, NuxtJS, TypeScript, Node.js, Apollo GraphQL, Neo4j, Vitest, REST APIs, Git, GitLab CI/CD, Docker, Python

Apr 2018 **Full-Stack Software Engineer**, *Keela.co*, Vancouver, BC, Canada (Remote: Nepal)

- Mar 2023
- Owned and shipped **10+ production features with defined KPIs** for **Keela**, a SaaS platform serving **500+ non-profit organisations**, contributing directly to product usability and user engagement, working in Agile/Scrum sprints from concept through deployment.
 - Led design and implementation of a **product revenue tracking** feature, enabling users to capture, process, and analyse financial data through dynamic and configurable workflows.
 - Built and maintained **integrations with third-party APIs** (e.g., payment providers), ensuring reliable data exchange and handling asynchronous workflows across distributed systems.
 - Built Keela's **Progressive Web App (PWA)** using Vue.js and service workers, increasing mobile session retention by ~25% and reducing first-load time by approximately 30%.
 - Spearheaded the **frontend migration to Vue.js** from a legacy stack, reducing bundle size and improving Time-to-Interactive by ~20%, resulting in measurably improved user retention metrics.
 - Designed and built an advanced **drag-and-drop email template builder** enabling users to create dynamic, configurable workflows with real-time feedback and complex state management, used by thousands of users daily.
 - Led UX improvements for the **mobile application** (React Native), delivering a more consistent cross-platform experience across iOS and Android.
 - **Mentored 3+ junior developers**, conducted code reviews, and helped establish frontend best practices, including component design systems and unit testing standards with Jest.
 - Collaborated closely with product managers and designers in Agile ceremonies to integrate and deliver features aligned with business goals and user needs.
 - **Technologies:** Vue.js, React, React Native, JavaScript, TypeScript, Node.js, Meteor.js, REST APIs, MongoDB, Mocha, Jest, Git, GitHub Actions, Stripe, Payrix, PayPal, Docker, Azure, Python

Technical Skills

Frontend	Vue.js, Nuxt.js, React, React Native, TypeScript, JavaScript (ES2022+), HTML5, CSS3, TailwindCSS, Vuex, Pinia, Redux, Webpack, Vite, PWA
Backend	Node.js, REST APIs, GraphQL, Apollo GraphQL, Meteor.js, Python, Express.js
Databases	MongoDB, Neo4j, PostgreSQL, MySQL
Testing	Jest, Vitest, Mocha.js, Unit Testing, Integration Testing
DevOps & Tools	Git, GitHub Actions, GitLab CI/CD, Docker, Azure, Cloudflare, Linux, Postman, Figma, Jira, Notion, Linear
Integrations	Stripe, Salesforce, Sendgrid, PayPal, Zapier, Payrix
Practices	Agile / Scrum, Frontend Architecture, UI Performance Optimisation, Responsive Design, Accessibility (WCAG), System Design, Code Review, Mentoring, Product Owner

Education

2023 – 2026 (expected)	M.Sc. International Software Systems Science , <i>Otto-Friedrich-Universität Bamberg</i> , Bamberg, Germany
2014 – 2018	B.Sc. Computer Science and Information Technology , <i>Tribhuvan University</i> , Kathmandu, Nepal

Languages

English	Professional working proficiency (C1)
German	Intermediate working proficiency (B1)
